

width type ◇ apparent ○ incomplete ● real

*channel-body width vs thickness, by depositional setting, river pattern, discharge regime*

*channel-body width vs thickness, by depositional setting, basin climate, discharge regime*

Scatterplots of width vs thickness of channel bodies for groups of analogues classified on combinations of river pattern and discharge regime (upper panel) and basin climate and discharge regime (lower panel). Symbols indicate the type of width observation (n = 4,785). NA indicates unclassified analogues
